

# AQUASTOP YARN SPECIFICATIONS

All the Aquastop fabrics are weaved with Aquastop Yarns. They all share therefore the same performance in terms of color stability when exposed to UV and the same inherent water. All the Aquastop fabrics are amazingly low weight when compared to the more traditional yarn options and are thermally stable, which means that they provide a barrier to heat and to cold. Normally rugged and resistant to abrasion, they repel by nature any liquid and are therefore awfully easy to clean, simply with fresh running water. Of course they are by nature mildew free and are anti bacterial.

The contact with Aquastop fabrics is lovely and natural, as our technology allow us to target specific hand feels.

Any Stile of Aquastop is available fire retardant to the highest grades upon request. Even when finished with specific resin systems, the material retains its natural characteristics and remains 100% recyclable.

The following table shows some suggestions of utilization of the constructions actually available, as in fact we have designed them with specific applications in mind.

However customer should finally decide the performance requested for his custom application.

## APPLICATION CHART

Styles	COVERS					PSA		ARREDO			
	PARASOL	MARINE	PLUS	ULTRA	PATCH	FURLING	RATTAN	TRIDI	ETNIC	MESH	
<i>(numbers describe water column of the product)</i>	<b>70</b>	<b>100</b>	<b>150</b>	<b>300</b>	<b>1200</b>	<b>5000</b>					

### Applications in Garden outdoor

<i>cushion and upholstery</i>	*	*	*						*	*	*	*
<i>protection to sun</i>	*	*	*									*
<i>protection to water</i>				*	*	*						
<i>roller blinds (might require further treatments and special widths)</i>	*	*	*						*	*	*	*
<i>pergolas</i>						*						
<i>furling cover sails</i>					*							

### Applications in House and Contract *(Contract application require FR finish depending on requested STD)*

<i>cushion and upholstery</i>	*	*	*	*					*	*	*	*
<i>curtains</i>	*	*	*						*	*	*	*

### Applications on Yachts

<i>furling UV protection</i>							*	*				
<i>reinforcement patches</i>							*					
<i>boom cover</i>	*	*	*									
<i>lazy bag</i>			*	*	*							
<i>genoa cover</i>	*	*										
<i>interior upholstery</i>	*	*	*						*	*	*	*
<i>exterior upholstery</i>	*	*	*						*	*	*	*

N.B. *(special coating can make any style 3mt of water column)*
